SciFi efficiencies

Velo efficiencies

My plan next:

- ① Finalise 2025 pre-TS tracking efficiency correction tables for analysts
 - Present in RTA WP4 next week before release
- ② Push RTA MC liason to request MC for 2025 post-TS
- ③ Large MC production almost finished for 2024, prepare to process this
 - Updated 2D binning
 - Binning in Velo A and C side hits
 - Reweight multiplicity
